## Nishkarsh NIEM PE v1.1 – Summary Sheet (Enterprise Data Sharing using NIEM Vocabulary and Context)

[Context](#) | [Discover](#) | [Share](#)

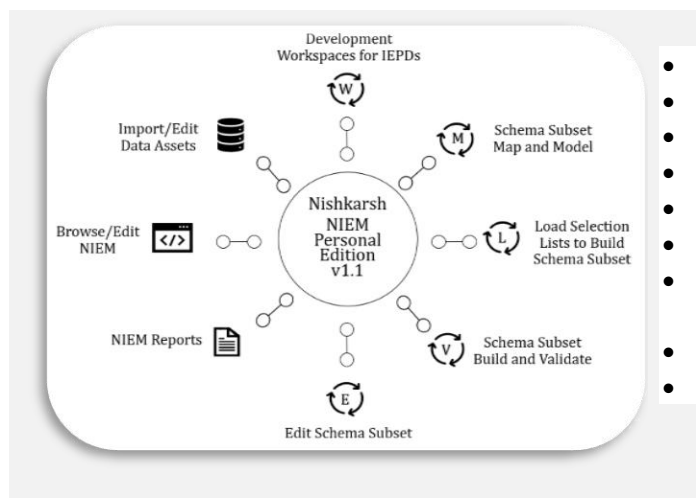

When shared across organizational boundaries, data may lose its meaning due to the lack of a common data vocabulary across organizations. The National Information Exchange Model (NIEM) is a common vocabulary that enables efficient information exchange across diverse public and private organizations.

NIEM is already being used at several agencies such as the Department of Defense and Department of Homeland Security to exchange data with partners. Enterprise e-Support's Nishkarsh<sup>1</sup> NIEM tool helps organizations add the NIEM common vocabulary to their data elements before sending it out to their partners, facilitating proper data understanding across organizations. Our Nishkarsh NIEM tool has already been vetted by the NIEM program and is listed on the NIEM.gov tools catalog.

### Nishkarsh NIEM PE v 1.1

### Benefits

### Features

- Standard Vocabulary
- Common Context
- Persistent Mapping
- Machine-readable Data
- Validate Schema Subset
- End-to-end Support
- Platform Agnostic (Windows, Linux, MacOS)
